Crohn's and the role of bacteria in the inflammation process

SPEAKERS:

Dr. David Armstrong
Professor, Department of Medicine

Dr. Brian Coombes
*Associate Professor and Associate Chair,
Department of Biochemistry and Biomedical Sciences
Canada Research Chair in Infectious
Disease Pathogenesis*

LEARNING OBJECTIVES:

- To appreciate Crohn's disease as a chronic inflammatory bowel disease responsive to immune suppressive therapy
- To understand why microbial triggers may be responsible for inflammatory changes in the gut
- To understand current research into the role of microbes in Crohn's pathogenesis
- To understand how microbes may work in concert with other known risk factors for Crohn's disease
