A TRANSLATIONAL VIEW OF: **Do obesity and associated health consequences begin in the womb?**

This seminar includes a clinical presentation with patient interview followed by a research presentation

SPEAKERS:

Dr. Katherine Morrison

*Associate Professor, Department of Pediatrics
Co-Director, Metabolism and Childhood (MAC)
Obesity Research Program*

Dr. Alison Holloway

*Associate Professor, Department of Obstetrics
and Gynecology, Division of Reproductive Biology
Associate Member, Department of Biochemistry
and Biomedical Sciences*

LEARNING OBJECTIVES:

- To understand the current health challenges related to obesity in Canadian children
- To understand the developmental origins of adult disease hypothesis
- To review the influence of early life exposures on subsequent cardiometabolic health in children and adults
- To learn how studies in the basic science laboratory are helping us to unravel the mechanisms responsible for this relationship
